

# HEADSET MasterUSB DUAL

**High-quality driverless headset with USB and stereo plug connectors**

The Master USB Dual headset for USB and stereo jacks is the versatile solution for computer and mobile audio devices. No driver installation is required for the high-quality headset. Just plug it into the computer's USB port and enjoy the full, rich sound of the music on your computer, and in online gaming or messenger applications. The integrated sound card with 24-bit audio technology guarantees absolute noise-free performance. Just place the microphone with built-in noise suppression nearby for crystal-clear voice transmission. Of course, you can disable this function using the Mute button.

The hardware equalizer provides a balanced soundscape tailored to your particular taste. Its four different settings let you fully customize the sound for any situation. An LED indicates which setting you have selected. If you want well-defined bass and clear treble even for quieter sounds, just press the Loudness button, which enhances the soundscape at low volumes.

Simply exchange the USB cable for the accompanying stereo plug cable to use the headset on mobile audio devices such as MP3, CD or MiniDisc players. You will enjoy the same exceptionally balanced soundscape.

The Master USB Dual headset—sound quality developed in Germany. The Master USB Dual headset is fully compatible with Windows PCs, and you can enjoy the same full range of functions just as easily and conveniently on a Mac or Linux computer.
