The DVB-T Card for Television and Video Recording on your PC!

Digital TV – via antenna!

With the Cinergy 1200 DVB-T, you can receive up to 30 TV channels on your PC in outstanding digital quality. Terrestrial antennas still frequently found in many households can generally be used without problems. Enjoy tomorrow's TV standard today with a minimum of installation effort!

Digital video recorder

The Cinergy 1200 DVB-T also turns your PC into a modern hard drive video recorder that can be programmed with ease thanks to its electronic program guide (EPG) support. All programs are displayed in a clearly structured window and can be recorded loss-free in MPEG-2 format — at the touch of a single button with its one-touch recording (OTR) function.

Timeshifting

The integrated timeshifting will revolutionize your viewing habits. Interrupt programs whenever you like and continue watching them later from where you left off. With the bundled software, you can burn recorded films directly to (S)VCD or DVD from your hard disk — without unwanted commercial breaks. Start your movie archive now!

Teletext & Radio

But there is much more, because the Cinergy 1200 DVB-T also features excellent teletext functionality. In addition, you can also receive and record digital radio programs in outstanding stereo quality.

Technical Details

- Digital Video and Radio Broadcasting via Antenna (DVB-T)
- Philips SAA-7146 chipset
- Philips DVB-T Tuner
- MPEG-2 and PVA Recording
- Dolby Digital (AC3) support
- TimeShifting
- Electronic Program Guide (EPG)
- Teletext Support

Software

- Drivers for Windows 2000 & Windows XP
- TerraTec Cinergy Digital TV Software
- Ulead DVD MovieFactory 3 TV
- Cyberlink PowerDVD 5 (6 channel version)

System Requirements

- 1.0 GHz Intel Pentium or AMD Athlon CPU
- 1 free PCI 2.1 slot (with busmaster support)
- 128 MB RAM
- 100 MB free HD space for full software installation
- Soundcard with DirectX support
- AGP Graphics board with DirectX and Video Overlay support
- CD or DVD drive for software installation
- DirectX 9.0 or higher
- Windows 2000 / Windows XP / Windows Vista
- Digital Terrestrial Reception (DVB-T)

System Recommendations

- 1.5 GHz Intel Pentium or AMD Athlon CPU
- 1 free PCI 2.1 slot (with busmaster support)
- 256 MB RAM
- 100 MB free HD space for full software installation
- Soundcard with DirectX support
- AGP Graphics board with DirectX and Video Overlay support
- CD or DVD drive for software installation
- DirectX 9.0 or higher
- Windows XP
- Digital Terrestrial Reception (DVB-T)

Package Content

- Cinergy 1200 DVB-T PCI card
- Driver & applications CD
- Manual on CD
- Service card
- Registration card

Art.No.:	10023
EAN-Code:	4017273100234
Warranty:	24 Months
