CINERGY 200 TV

### TV Tuner & Video Recorder

Television and Video Recording on your PC!

You want to view your favourite TV program on your monitor with needle-sharp clarity, then burn it to a CD for eternity? Convert your computer into a multimedia center for television, radio and video recording with the TerraTec Cinergy 200 TV. The automatic tuning feature finds all available channels, including their station names, in just a blink of the eye. The Multi-Channel Preview feature puts a complete overview of all running TV programs on your screen at the push of a button.

The TerraTec Cinergy 200 TV offers everything you need for recording videos on your PC, including convenient timer controls for recording individual programs. WinDVR supports all prevalent audio and video formats (even DivX!). In addition, with InterVideos WinDVR 3 VCD, you get a powerful video recorder program that lets you save your TV programs or videos from external devices like VHS video recorders onto your hard drive as video CDs and lets you burn them to CD-R.

The integrated high-speed teletext with page caching ensures that the latest information on the program is always at your fingertips, without the need for the Internet. You can browse through the supplemental program and immediately obtain free information!

TERRATEC®
