

# CINERGY 250 PCI

One for all!

Pamper your senses with razor-sharp, flicker-free images, stereo sound and maximum viewing convenience. With the Cinergy 250 PCI, you can now enjoy analog TV and FM radio reception on your PC anywhere—wherever your sofa happens to be.

The automatic station scan finds all available stations and names them. The multistation preview delivers current pictures from all stations at a glance, with picture sizes scalable from a small window to full-screen. In addition to antennas, cable networks or satellite receivers, the Cinergy 250 PCI can also be used with camcorders and DVD players.

It also features extensive video recording functionality—save stills, video clips or the entire evening's programming on your hard drive! The TerraTec Cinergy 250 PCI supports nearly all current audio/video codecs (DivX, Xvid, etc.). Timer-controlled MPEG recording is child's play with the included InterVideo WinDVR VCD video recording software.

With its integrated high-speed teletext and page memory, you can surf through the supplementary programming for free, current information. Whether music, information or news: The Cinergy 250 PCI also provides you with top FM radio reception in stereo. Station, volume, recording—just lean back and control the full range of Cinergy functions from the comfort of your sofa! The included remote control can be programmed with ease and can also control virtually any Windows application.

# CINERGY 250 PCI

## Technical Details

### Features

- Tuner for all worldwide TV standards (PAL, PAL-I, SECAM, NTSC)
- FM stereo radio reception
- Video/audio input for camcorders, DVD players, satellite receivers, VCRs etc.

### Software

- TerraTec Cinergy Application (TV software)
- InterVideo WinDVR 3 VCD (Videorecorder software)
- Active Radio (Radio software)

### Scope of delivery

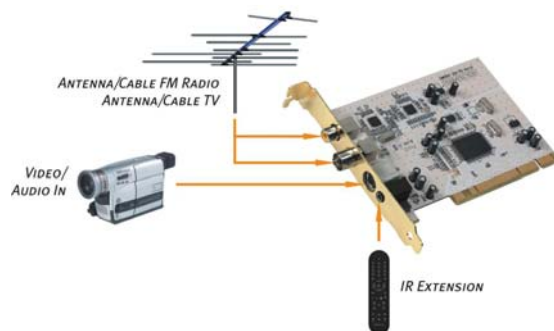

- Cinergy 250 PCI
- Infrared remote control
- Infrared signal receiver
- Software/driver CD
- Manual on CD
- Registration card
- Service card

### System requirements

- 1,0 GHz Intel Pentium or AMD Athlon CPU
- 256 MB RAM
- 1 free PCI 2.1 slot
- DirectX 9.0 or higher
- Sound card with DirectX support
- PCI or AGP graphics card with DirectX compatible drivers and video overlay support
- CD/DVD drive for software installation
- Microsoft Windows 2000/XP/Vista

### System recommendations

- 1,5 GHz Intel Pentium or AMD Athlon CPU
- 512 MB RAM
- 1 free PCI 2.1 slot
- DirectX 9.0 or higher
- Sound card with DirectX support
- PCI or AGP graphics card with DirectX compatible drivers and video overlay support
- CD/DVD drive for software installation
- Microsoft Windows XP with Service Pack 2
