

The perfect TV solution for your notebook computer!

TV wherever and whenever you want? Consider it done with the Cinergy 400 TV mobile! A quick slip of the wrist and your laptop is converted into a mobile video screen – stereo sound, teletext and hard drive video recorder included.

More than just TV

Using the Cinergy 400 TV mobile is easier than you might think: Simply plug the compact PCMCIA card into the PCMCIA slot in your notebook and you're done. The Cinergy 400 TV mobile offers much more than a common television: The Time-Shifting function, for example, allows you to pause a live TV programme at any time, restart a programme from the same position later or jump to any scene your like.

Personal video recorder

Use the Cinergy 400 TV mobile as your personal video recorder: All TV programmes can be recorded to the hard drive simply at the touch of a button (one-touch recording) or according to an automated time schedule. All common standards, such as MPEG1/2, (S)VCD, DVD, DivX and other installed Codecs are supported. Furthermore, this mobile TV solution is equipped with S-Video, composite and stereo-audio inputs, so that without any other equipment you can record movies from DVD players, video recorders, video cameras and satellite receivers onto your laptop.

Film-Archiving on DVD and Video CD

The software included with the Cinergy 400 TV mobile allows you to create and manage your own video archive. With it, you can easily and conveniently burn the programs you have recorded to DVD or video CD. With a flick of the wrist, you and the Cinergy 400 TV mobile can turn your notebook into a portable television, video recorder and DVD production studio!

Technical Details
