

CINERGY 800e PVR

Never miss a program again

With the Cinergy 800e PVR, your computer becomes a powerful and versatile video recorder for analog television. The video compression required takes place directly in the device, so no additional load is placed on your computer.

Connecting the Cinergy 800e PVR is simple. Just connect the box to your computer using a USB cable, connect the television cable you usually use (cable or house antenna), and install the software—you are already receiving analog television with full-fledged stereo sound.

In the Cinergy 800e PVR, particular importance has been placed on its function as a digital video recorder. The recordings are compressed directly in the device (MPEG 2) and stored on the hard drive in DVD quality, saving valuable system resources. Especially with older systems, this makes it possible to make clean recordings for the first time.

Everything is as easy as child's play to operate. Either start recording by pressing a button while the program is running or program it to record while you are away. You can then edit the finished file in the software provided and remove blocks of commercials and other interruptions. Then burn the finished results to DVD.

Don't forget the many other advantages provided by watching TV on your computer: time-shifting TV programs, teletext, editing out commercials and other features will change your life.

The Cinergy 800e PVR can be perfectly used in a home entertainment system with Windows Media Center Edition (MCE). Thanks to the appropriate drivers, all functions of Windows MCE are available.

CINERGY 800e PVR

Technical Details

Features

- Analogue TV for notebook and PC
- Recording with hardware MPEG2 encoder
- Scheduled recordings and time shifting
- Teletext
- Windows MCE compatible
- USB 2.0 interface, 480 Mbps
- Infrared remote control
- Analogue video input via hardware MPEG2 encoder: S-Video, Composite
- Stereo audio input
- Full version media software for cutting and burning
- Windows MCE compatible

Technical Data

- USB 2.0 HiSpeed (480Mbps)
- Driver Support: Windows XP (SP2)
- Plug n' Play
- Capture formats (MPEG-Encoder): DVD, MPEG2
- External power supply +5V DC 2A
- Current: 715 mA
- Housing colour: aluminium/white/orange/
- Dimensiones: 140x64x27 mm (HxBxT)

Tuner

- Input frequency (42 – 862 MHz)
- Input impedance: 75 Ohm

Infrared remote control

- 37 buttons
- 2 x AAA batteries

Software

- ArcSoft TotalMedia2

System Requirements

- 1,8 GHz Intel or AMD CPU or comparable Centrino certified Notebook
- 512 MB RAM
- Windows XP SP2
- USB 2.0 interface
- 150 MB free disc space for software installation
- Audio hardware with DirectX support
- DirectX compatible graphics board and video overlay support
- CD/DVD drive for driver and software installation
- DVD drive for creating DVDs
- Analogue TV reception (antenna or cable)

Package Contents

- TerraTec Cinergy 800e PVR USB Box
- USB 2.0 cabel (1,8 m)
- Power supply
- Breakout cable video input / audio input
- Infrared remote control incl. Batteries
- Installation/software CD-ROM
- Manual on CD-ROM
- Service card
- Registration card
- Quick Setup Guide
- Software

Art.Nr.: 10337
EAN-Code: 4017273103372
Garantiezeit: 24 Monate
