

# CINERGY hybrid Stick HD

**Versatile and inexpensive – the Hybrid Stick for beginners!  
With HDTV support**

- Television on your computer
- Mobile DVB-T and analogue TV reception
- HDTV-Support
- Recording on hard drive
- Timeshifting
- Electronic programme guide and teletext
- Including remote control

## **Cinergy Hybrid Stick HD**

Simply plug the Cinergy Hybrid Stick HD into a USB port on your computer, install the TerraTec Home Cinema Basic TV software provided, and just like that, the world of mobile TV is open to you. The Cinergy Hybrid Stick HD includes everything you need to turn your laptop, netbook or desktop computer into a television with built-in video recorder and many other functions - a mini rod antenna for mobile DVB-T reception is included. You are free to choose whether to watch digital television via DVB-T or conventional analogue television. No batteries required at all.

## **Watch TV everywhere**

Along with your laptop or netbook, the Cinergy Hybrid Stick HD opens up completely new opportunities. No matter if you want to see the latest stock exchange news at work, watch a current series with friends in your garden or watch a football game in the park after kicking a ball around with the lads—you can now do all of this very easily. The Cinergy Hybrid Stick HD is as small as a USB stick and comes with everything you need for mobile DVB-T reception. Nothing stands in the way of ultra-mobile television reception in all DVB-T reception zones anymore. Of course, you can also simply plug the Cinergy Hybrid Stick HD into your desktop computer - in no time at all, you have a second TV in your home. You are free to choose between television via DVB-T or the conventional analogue signal directly from the wall cable outlet.

## **Recording on hard drive and timeshifting TV programs**

The TerraTec Home Cinema Basic software provided turns television on the computer into an experience. You can easily record the program that is in progress to your computer's hard drive, and can later burn all episodes of your favourite series to a DVD. Timeshifting is very useful indeed. If your Sunday mystery has already begun and the pizza delivery man rings the doorbell, simply pause the program that is in progress at the touch of a button - and, after the interruption, pick up right where you left off! The built-in electronic program guide (EPG) and the familiar teletext make personal TV planning easier than ever.
