CINERGY T Express

DTT (Freeview) TV Tuner

· DVB-T receiver for the ExpressCard/34 interface
· Digital video recorder
· Time shifting
· Including DTT antenna
· Teletext and electronic program guide (EPG)

The Cinergy T Express opens up a world of new possibilities. No matter if you want to watch the latest stock exchange news at work, a feature film in your living room or a soccer game with friends outside on your patio—all of this is now possible. The Cinergy T Express comes with everything you need for DVB-T reception. With Cinergy T Express, nothing stands in the way of mobile television enjoyment anymore.

Connect and get going
Just plug the Cinergy T Express into the ExpressCard/34 slot of your notebook, connect either the provided DVB-T antenna or your regular household antenna via an adapter, install the provided TV software, and you're ready to watch TV. The Cinergy T Express includes everything you need to turn modern laptops into a television with a video recorder and many other functions. (A mini rod antenna suitable for this is included in the scope of delivery.) No batteries required.

Wide range of recording functions
In addition to the functions offered by normal cinema systems when watching TV via computer, such as time shifting, electronic program guides (EPG) and digital video recording, the TV software offers some new functions: The computer boots up from standby or sleep mode precisely when the chosen television show begins and then saves it on your hard drive automatically. It's even easier to record using the electronic program guide, or directly, while a program is in progress—one click is all that's needed. No matter how you plan your recordings, they can be viewed immediately, even while the recording is in progress!
