

TERRATEC PROTECT MOBILE

Smart theft protection for your mobile phone

- Smart theft protection for iOS systems
- Remote control for smartphone camera with single or multiple snapshot mode
- Key and Smartphone finder
- Elegant design
- Small power consumption, up to 6 months battery lifetime

The clever key pendant „TERRATEC PROTECT MOBILE“ incl. practical remote control, is helpful in two respects. Thus, the key pendant which connects to the Smartphone or Tablet PC via Bluetooth 4.0 serves as portable theft protection and gives an acoustic signal as soon as the coupled device goes away from the key pendant. The iOS device which needs to be connected is equipped with the free of charge application and is controlled by this application. Thus it is possible to select for instance the „Home mode“ via the application which gives an all-clear at home avoiding an alarm. Also the reach which may be generated between the „TERRATEC PROTECT MOBILE“ and the Smartphone or Tablet may be controlled in this way. If, the other way around, the key pendant is missing, the application can release an acoustic alarm on the „PROTECT MOBILE“ and long searching is a thing of the past.

Furthermore, the remote control included in the delivery acts as remote release for the Smartphone or Tablet camera. Also it is no problem to take serial photos from a distance. The remote control also allows to change-over between the front and rear cam.

Thanks to the low energy consumption the „TERRATEC PROTECT MOBILE“ has a service life of 6 months. Then it is possible to easily and rapidly replace the round cell battery.

TERRATEC PROTECT MOBILE

Smart theft protection for your mobile phone

Features

- Wireless Bluetooth 4.0 technology
