CAMEO Drive!

FireWire™ HardDisk Case

Cameo Drive! Mobilizing even large amounts of data

You are digitally processing your videos at the computer? You are dealing a lot with graphics and image editing? Or are you a music fan who loves to experiment with sounds and loops on his home PC? In this case, you will certainly and quickly accumulate gigabytes of data on your hard disk. This is no problem given today's storage devices. Unless, of course, you need to transport your data, for example, for use on another PC. Or archiving them so that they can be retrieved at any time, without problems and with maximum transfer rates.

Cameo Drive! now mobilizes even large amounts of data. Because this external housing with FireWire™ interface enables you to make a regular 3.5" hard disk or even other IDE storage devices, such as ZIP or MO drives, portable in no time at all.

Tremendously fast data transfer with up to 50 MB/s thanks to FireWire™

The Cameo Drive! features the latest FireWire™ and bridging technology. This allows for tremendously fast data transfer rates of up to 50 MB/s. Its truly hot-pluggable feature allows the connection of Cameo Drive! while the system is running. Overall, up to 63 FireWire™ devices can be operated via 2 FireWire™ ports.

Plug it in and connect it—and it's ready!

Your hard disk is installed in no time at all. Simply insert the drive into the Cameo Drive! and connect it with your PC via FireWire™ interface—you can immediately use your data like an internal hard disk drive. The required cable is supplied, just like the proper AC adapter for the Cameo Drive!.

CAMEO Drive!

FireWire™ HardDisk Case

Technical Details

Hardware

- IDE-FireWire™ bridging board
  - IEEE1394 OHCI compatible
  - SBP-2 Target Revision 4 compatible
  - 2 FireWire™ ports (all 6 pin)
  - "Bus-Power" looped through
  - Supports up to 63 FireWire™ devices
  - Installation of any commercial 3½" hard-disk
  - Supports PIO Modes 0 - 4, DMA Modes 0 - 2 and Ultra DMA Modes 0 – 5
  - Microsoft Win98SE, WinME, Win2000, WinXP and MacOS (from 8.6) compatible
- Shielded 6 pin/6 pin FireWire™ cable
- External connector power supply with adapters for international standards

System requirements

- FireWire™ card with external 6-pin IEEE1394 FireWire™ connector (e.g. TerraTec Cameo DV)
- Operating system Microsoft Windows 98SE/ME, Windows 2000/XP

Recommended System

- TerraTec Cameo 200 DV, TerraTec Cameo 400 DV or TerraTec Cameo 600 DV
- Operating system Microsoft Windows 2000 or XP

Compatibility**

- ADS PYRO 1394DV
- ADS PYRO PlatinumDV (PCI)
- ADS PYRO ProDV (PCI)
- ADS PYRO BasicDV (PCI)
- Canopus DVRaptor
- DPS Spark
- DPS Spark Plus
- Exsys EX-6500
- Guillemot DV Action
- Fast DV Master
- Pinnacle Systems DV200
- Pinnacle Systems DV500 Plus
- Pinnacle Studio DV 1.03
- TerraTec Cameo 400 DV
- TerraTec Cameo 600 DV etc..

**) Cards of other manufacturers that feature an internal IEEE1394 Firewire connection. Without guarantee.

Art.Nr.:	1432
EAN-Code:	4017273614328
Warranty:	24 month
