Burn your VHS tapes to DVD

Good and easy: With the Grabster AV 150, you can turn your old VHS tapes into top-quality digital films with just a few clicks of the mouse, and then archive them to CD or DVD using the full version of Ulead MovieFactory 3 included in the package.

Easy to connect

Connecting the Grabster AV 150 is dead easy. Just plug it into a USB 2.0 port on your computer or laptop, connect the audio cable, install the software – you're done. Now connect the video cassette recorder to the Grabster AV 150, and nothing more stands in the way of backing up your valuable movie memories and collections of shows. You can connect other devices, like a camcorder, satellite receiver or DVD player, for a vast variety of uses and applications...

Burning finished recordings

The recordings are saved on the computer automatically. With the software provided, you can cut out the commercials or cut your own clips. Would you rather watch the finished films in the living room or at a friend's house? Not a problem: Simply burn your videos to CD or DVD. You can duplicate these infinitely...

Grabster AV 150. The most affordable and easiest way to beam your VHS tapes into the future of digital!

GRABSTER AV150
